Remediation Project Manager  
Raytheon Technologies  
9 Farm Springs Road, MS9 FS-101  
Farmington, CT 06032

RE: *Town of Andrews Drinking Water*

Dear Mr. Baron,

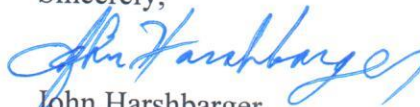

Attached are the sampling results for a water sample that one of our residents collected from her kitchen sink on July 1, 2020. As you can see, the results show that she had vinyl chloride in her drinking water at the level of 1.8 µg/L.

This is totally unacceptable. You told us that on June 19, 2020, Stantec tested the air stripper and determined it was working properly. On June 22, 2020, we shut down Well 1, and IDEM told us were safe to use wells 2 and 3. On June 27 and 28, 2020, we flushed the town's water lines. Yet, even after all of that work, we still have vinyl chloride in our drinking water. That is on top of the cis-1,2-DCE that has been detected in almost every single drinking water sample collected since 1994.

Raytheon's air stripper has never removed all of the chemicals from our drinking water as you and IDEM promised us it would.

IDEM pressured us into lifting the do not drink advisory. Now, our residents are drinking both vinyl chloride and cis-1,2-DCE. We again demand that Raytheon immediately remove all of its contamination from our drinking water aquifer. In the interim, we demand that Raytheon install new public wells in a clean aquifer.

Sincerely,

John Harshbarger  
Andrews Town Council President
